

Century Essential Series

TORCH-RF MONO AD Antenna

Simple & Eye-catching Protection & Promotion

Century TORCH-RF (CA3003X) MONO AD antennas, with advertising light boxes integrated, supply extra-high added value to both Century partners and retailers. Detection performance and noise immunity are kept excellent. Advertisement is attractive. The posters can be simply applied and replaced. Installation and configuration are easy. Maintenance is convenient.

**TORCH-RF
(CA3003X)**

Key Features

1 SUPERIOR PERFORMANCE

- Long range detection
- Enhanced noise immunity
- Remote service
- Attractive advertisement
- Visual and audible alarm indications

2 HIGH QUALITY PRODUCTION

- High quality materials
- Strict quality control system

3 EASY INSTALLATION

- Built-in electronics
- Simple configuration

Dimensions & Weights

Model	Dimension (H*W*T) (mm)	AD Poster (H*W) (mm)	Weight (kg)
CA3003X	1570*500*80	1550*480	13.5

Detection Ranges

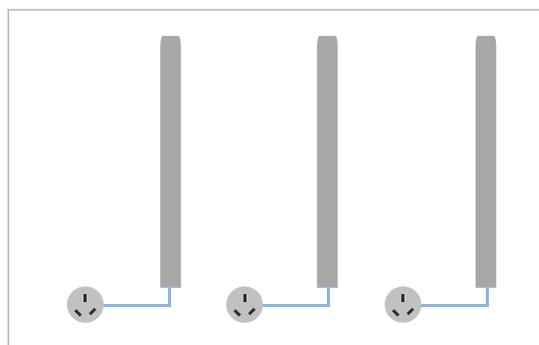

Tag	GF4040H	T001B
Detection Range(both sides)	65-85cm	70-90cm

Note: The above-mentioned detection ranges are the average detection ranges in relative clean environment for reference use only. The ranges vary for tags in different orientations at different positions to the antennas in different electromagnetic environment.

Specifications

Technical specifications	
Central frequency	8.2MHz
TX frequency bandwidth	7.6-8.7MHz
Power consumption	165W (When light box ON) 20W (When light box OFF)
Alarm audio level	110dB
Environmental requirements	
Temperature	0~55℃
Relative humidity	0-85%, non-condensing

Modes of Combinations

(Multiple transceiver antennas)
