# SU Tag T228

Single-use Tag against wardrobing

SU Tag (T228), the new tag concept is recommended to be used, in order to reduce the number of fraudulent articles-returns. It is very effective in preventing "clients" from simulating a wardrobe typical process and misusing the fitting-rooms or the sales surface, when returning merchandise and claiming for a non-justified full refund. SU Tag (T228) is easy to attach to the clothing, by using a pin in a highly visible area and in a bright red color. Attention will be attracted signifying that the merchandise is protected.
